Alejandro Mariani

Full-Stack Developer

Venezuela · Remote work (UTC-4) · +58 424-9147468 · amariani.monagas@gmail.com
amagnomariani.github.io/cv · linkedin.com/in/alejandro-mariani-03b535351 · github.com/aMagnoMariani

PROFESSIONAL PROFILE

Full-Stack Developer experienced in building and deploying complete web applications with Django, PostgreSQL, Flask and React/TypeScript. Led a team of 5 developers and automated Valcor's hiring process, cutting screening time by 40%. Maintain a production medical-records system handling 1,440 appointments per month. English B1. Available for remote work (UTC-4).

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, Go, SQL, Java, C++, Lua
Backend: Django, Flask, REST APIs, PostgreSQL, MySQL
Frontend: React, Vite, Tailwind CSS, Bootstrap, HTML5, CSS3
Data: SQL, relational modeling, pandas, dashboards, KPIs
Tooling: Git, GitHub, Linux, pytest, Scrum, GoHighLevel

PROFESSIONAL EXPERIENCE

AI & Automation Specialist — Valcor · Remote (USA) 02/2025 – 03/2025

- Built GoHighLevel automation workflows that cut candidate screening time by 40%.
- Developed the AI system for interviews and technical proposals, from script to document generation.
- Redesigned the development team's project management with Scrum and migrated manual processes to integrated platforms.

Head of Programming Department — Society of Petroleum Engineers (SPE) 12/2024 – 02/2025

- Led a team of 5 developers, ensuring on-time delivery.
- Implemented Scrum-based project management and coordinated priorities across departments.
- Optimized internal processes by migrating the team to updated technologies.

Data Analyst — SPE 10/2024 – 12/2024

- Automated data collection and statistical analysis to identify trends.
- Built interactive dashboards for KPI tracking.
- Produced executive reports and predictive models for decision-making.

PROJECTS

Medical Records System | Django · PostgreSQL · Bootstrap · JavaScript | in production
github.com/aMagnoMariani/historial_medico

- In use at a private clinic, handling 1,440 appointments and records per month.
- 8 modules: appointments, diagnoses, history, measurements, statistics, users, identification and catalogs.
- Custom PostgreSQL schema, versioned migrations and on-premise deployment.

Epsilon — Shipping System | Python · Flask · OpenStreetMap | lead author, 62% of commits
github.com/aMagnoMariani/Epsilon-SistemaEnvios

- Implemented from scratch a B-tree, hash table, priority queue, stack, doubly linked list and Dijkstra graph.
- Real street routing with a 100% offline map; 49 unit tests with pytest.

PharmaSystem | React · TypeScript · Vite · Tailwind
github.com/aMagnoMariani/pharmaSystem

- Inventory, billing and reports with barcode generation.

EDUCATION

Systems Engineering (B.Sc.), primary degree — Universidad de Oriente (UDO) 03/2023 – present

Associate Degree in Computer Science — Universidad Bolivariana de Venezuela (UBV) 10/2022 – present

Associate Degree in Mechanics — UPTN «Ludovico Silva» 10/2022 – 2026

CERTIFICATIONS

Ethical Hacking Fundamentals · Web System Vulnerability Detection · Process Automation with GoHighLevel (GHL)

LANGUAGES

Spanish — native · English — B1 (no certification; technical reading and documentation)
